ElcomSoft Releases a Mobile Data Explorer

Moscow, Russia – December 12, 2014 - ElcomSoft Co. Ltd. announces the release of [Elcomsoft Phone Viewer](), a mobile forensic tool enabling experts to view information stored in mobile backups. Supporting local and cloud backups produced by iOS, BlackBerry 10 and Windows Phone 8, Elcomsoft Phone Viewer allows viewing contacts, messages, call logs, notes, and calendar. The tool can recover deleted messages from iOS backups.

"We have many tools for retrieving mobile data, recovering passwords and decrypting protected information, but lacked a solution for actually viewing the data", says Vladimir Katalov, ElcomSoft CEO. *"Elcomsoft Phone Viewer was released by customer demand. While no replacement for a high-end analytic suite, our tool offers experts a quick, easy and inexpensive way of looking into the content of mobile backups".*

Elcomsoft Phone Viewer supports unlocked, unencrypted backups only. Encrypted data or backups protected with a password must be first processed with Elcomsoft Phone Breaker to remove protection. This small, inexpensive tool offers a simple and convenient user interface that matches the user interface of Elcomsoft Phone Breaker, thus requiring no additional learning curve.

At this time, Elcomsoft Phone Viewer is only available for Windows PCs; a Mac version is in development. Future releases will include the ability to access app-specific data as well as information extracted with Elcomsoft iOS Forensic Toolkit via physical acquisition.

About Elcomsoft Phone Viewer

Elcomsoft Phone Viewer allows mobile forensic experts viewing information stored in unprotected local and cloud backups produced by popular Apple, BlackBerry and Windows Phone devices. The tool offers access to contacts, messages, call logs, notes and calendar, and allows viewing information about the device such as model name, serial number, date of last backup etc.

The tool supports all of the following formats:

iOS: Local iTunes backups as well as iCloud backups downloaded with Elcomsoft Phone Breaker produced with all versions of iOS from 6.0 up to the latest 8.1.1 and with all Apple devices including the latest iPhone 6 and iPhone 6 Plus.

Windows Phone 8 and 8.1: Information downloaded from Microsoft cloud with Elcomsoft Phone Breaker

BlackBerry 10: Elcomsoft Phone Viewer is one of the very few tools capable of displaying BlackBerry 10 backups.

Pricing and Availability

Elcomsoft Phone Viewer is available immediately. At this time, the Home edition is the only one available. Elcomsoft Phone Viewer is available to North American customers for $79. The Standard edition is available for $79. Local pricing may vary.

Elcomsoft Phone Viewer runs in 32-bit and 64-bit editions of Windows Vista, Windows 7, 8, 8.1, as well as Windows 2003, 2008 and 2012 Server. Elcomsoft Phone Viewer operates without Apple iTunes or BlackBerry Desktop Software being installed.
